Disconnect

Help

Embark on your personal space odyssey ! **Four planets** orbit around you, each representing a **key feature**.

**Need help** ? The "**Help**" button quickly guides you through the galaxies of our features.

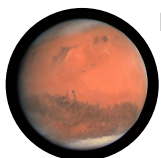

You want to **end your journey** ? The "**Disconnect**" button brings you back to the login/register page."

Here is a **brief description** of the planets, **follow the rest of the guide to discover more**

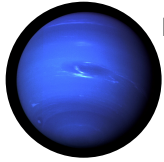

## Earth: Mother Planet

- **Manage** and **modify** your **personal information** (first name, last name and e-mail).

## Mars: The Connection Planet

- Explore the red planet, to **connect** your 6 essential **services**. This is the gateway to creating the building blocks of your automations.

#### Neptune: The Creation Planet

- Discover the depths of Neptune, the planet of creation. Here, you can bring your automation ideas to life and **build** new **action-reactions**.

#### Moon: The Management Planet

- Journey to the Moon to **manage** your **automations**. Find, edit, and organize your AREAs with ease.

Explore each planet by clicking on it.  
Return to the main view by clicking again on the planet.

## Edit your **personal informations**:

First, click on **Earth**

The screenshot shows the 'AREA51' user interface. At the top, the text 'AREA51' is displayed in large yellow letters. Below it, there is a central graphic of the Earth with a blue orbital ring. Surrounding the Earth are three white rectangular boxes for editing personal information:

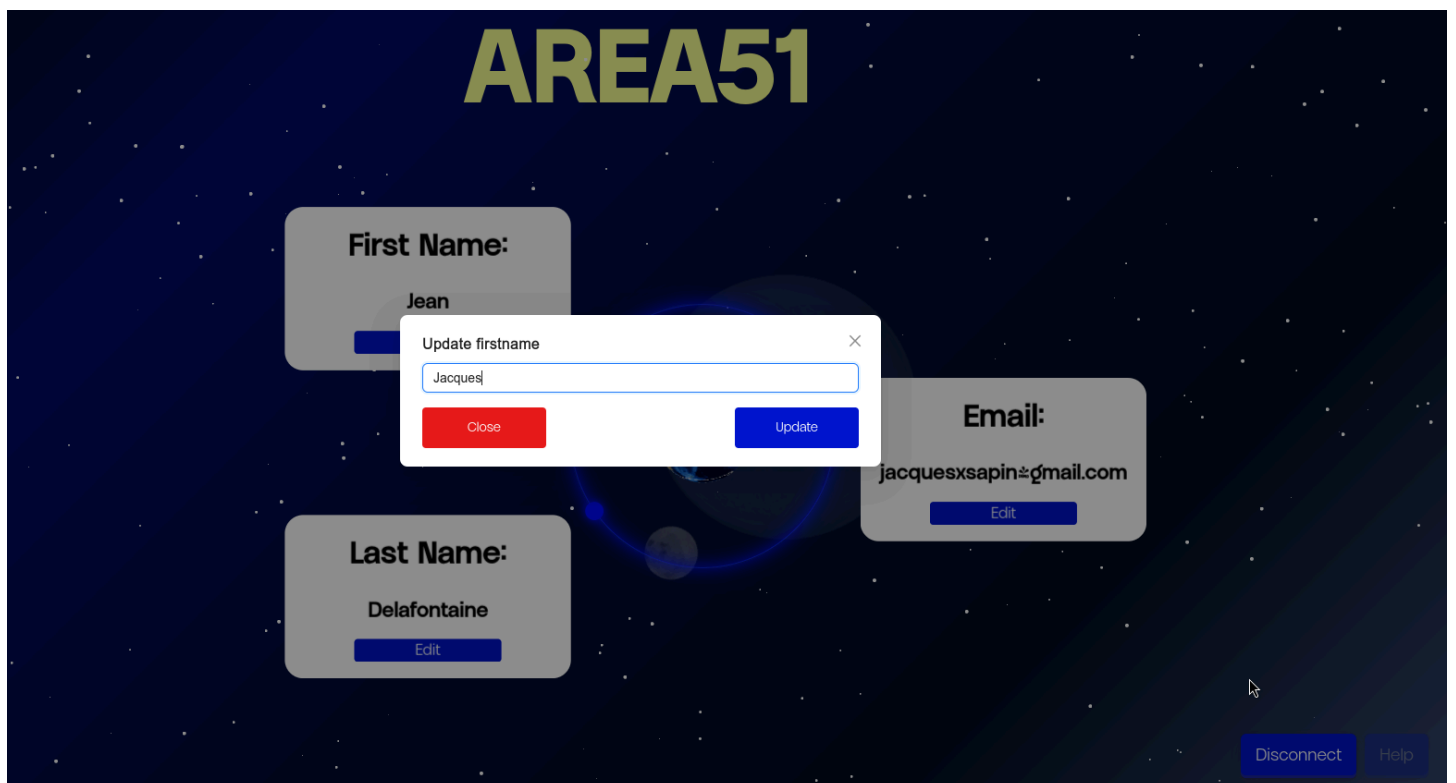

- First Name:** Jean  
[Edit](#)
- Last Name:** Delafontaine  
[Edit](#)
- Email:** jacquesxsapin@gmail.com  
[Edit](#)

At the bottom right, there are two buttons: [Disconnect](#) and [Help](#).

Now, click on the appropriated "**edit**" button for the information you want to modify.  
For example, I will change my First Name

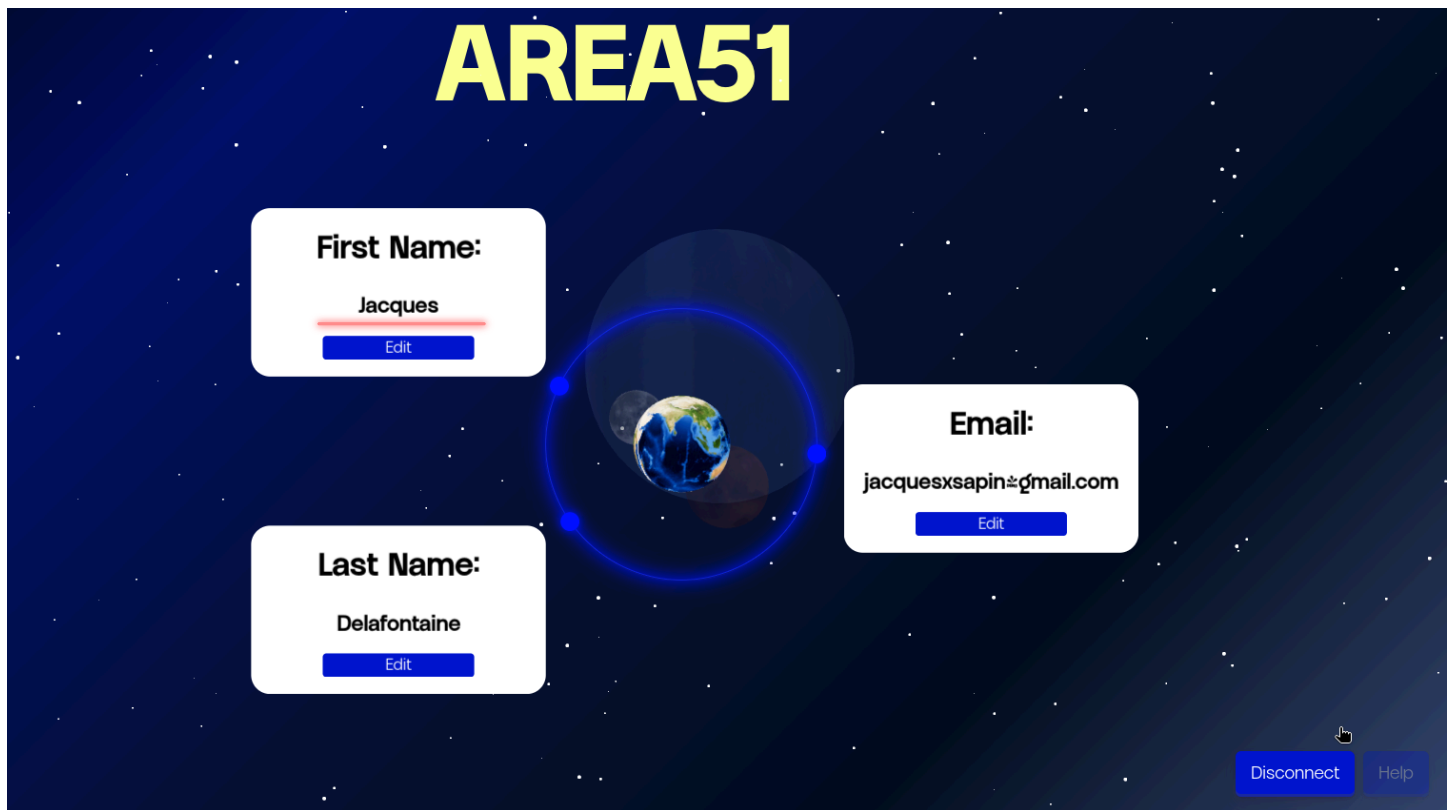

A pop-up appears. Edit and click on "**Update**" if you want to commit your change.

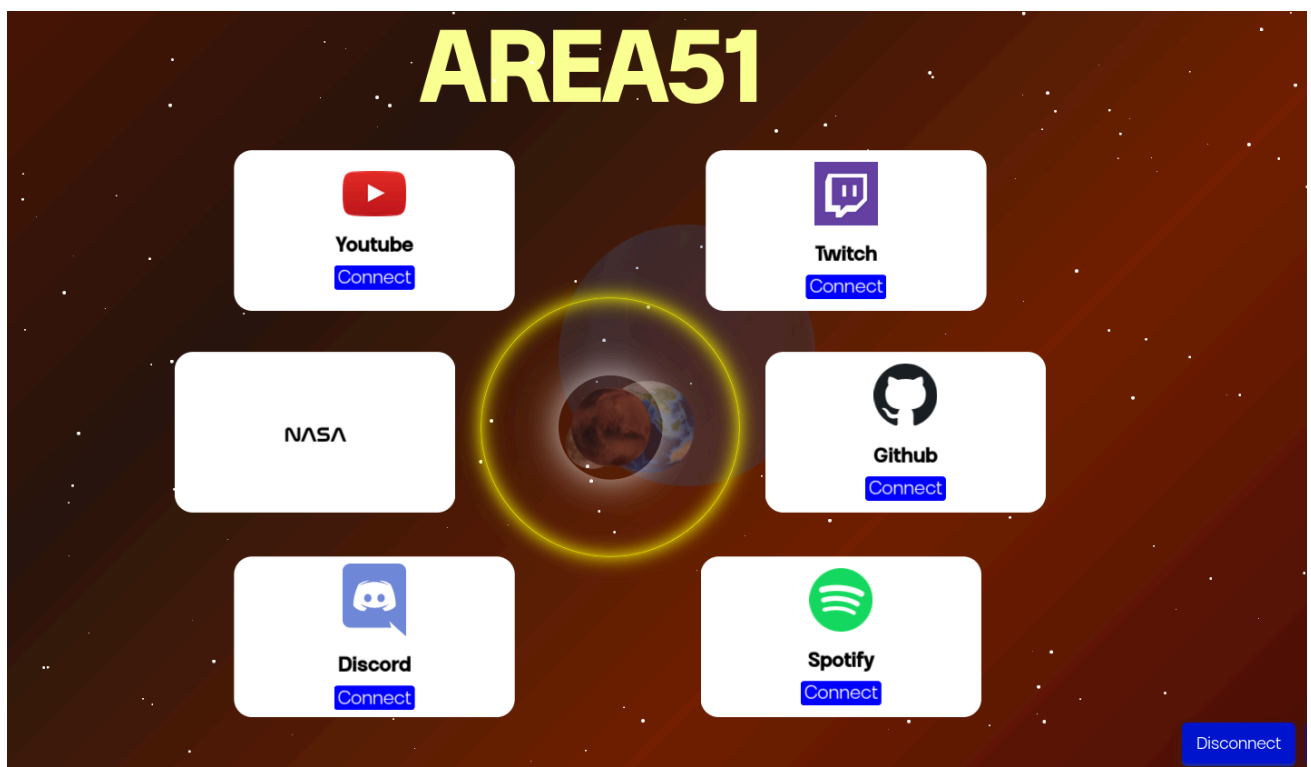

The **page refreshes itself** and when you click on **Earth** : First Name have changed !

## Connect your services !

Click on **Mars**, the red planet will show you the **6 services** you can connect to. (5 because Nasa's service don't require identification)

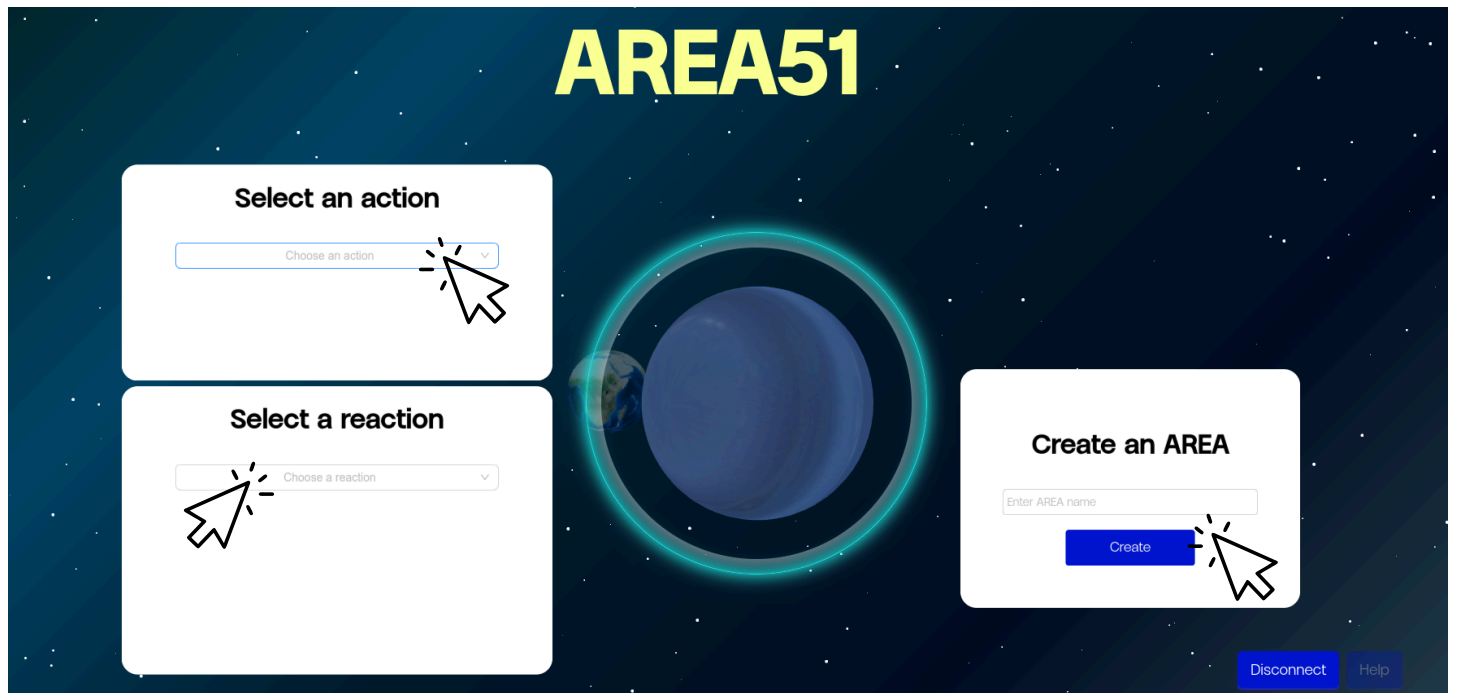

By **clicking** "**Connect**", you can link your accounts to AREA-51 and start building personalized automations !

After connecting to the wanted services,

# Let's **create** an **action-reaction** !

For this, click on **Neptune**

**Build** your automation ! Follow these simple steps:

1. **Choose Your Trigger:** Select an event that will initiate your automation.
2. **Pick Your Response:** Decide what action you want to take in response to the trigger.
3. **Name Your Creation:** Give your automation a memorable name so you can easily find it later."

You will maybe need to complete some **additional parameters**. They allow you to add **more personalization** to your AREAs.

Let's do one together :

I choosed "*Gets the position of the iss*" as an **action** and I precised the City I want to track.

I choosed the **reaction** "*Lunch playlist of your choice*" (from your personal Spotify account).

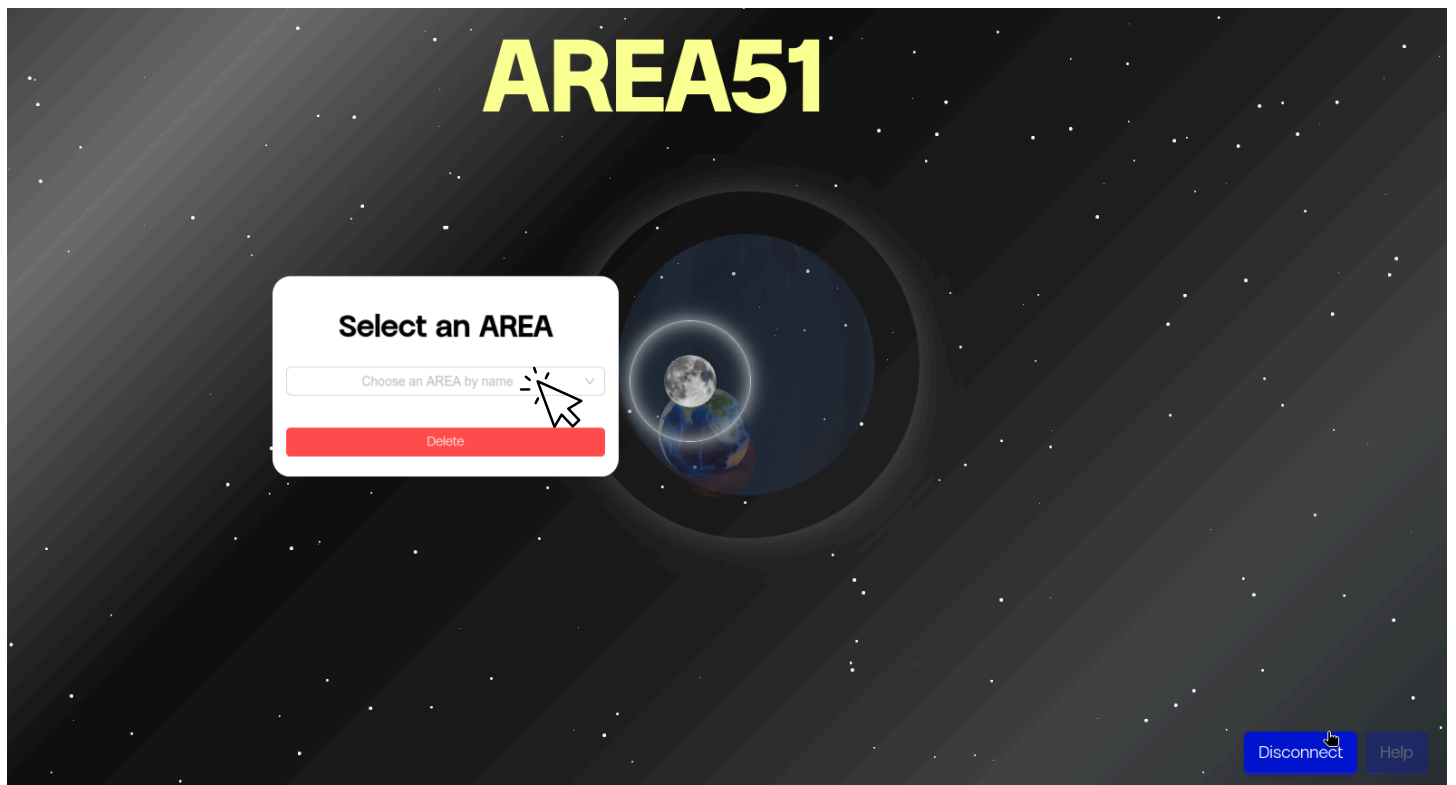

And I gived a **name** to the **AREA** : "*myFirstAREA*"

Then click on "**Create**". A little message will appear to confirm you the creation of your new AREA.

## You want to **manage** your **AREAs** ?

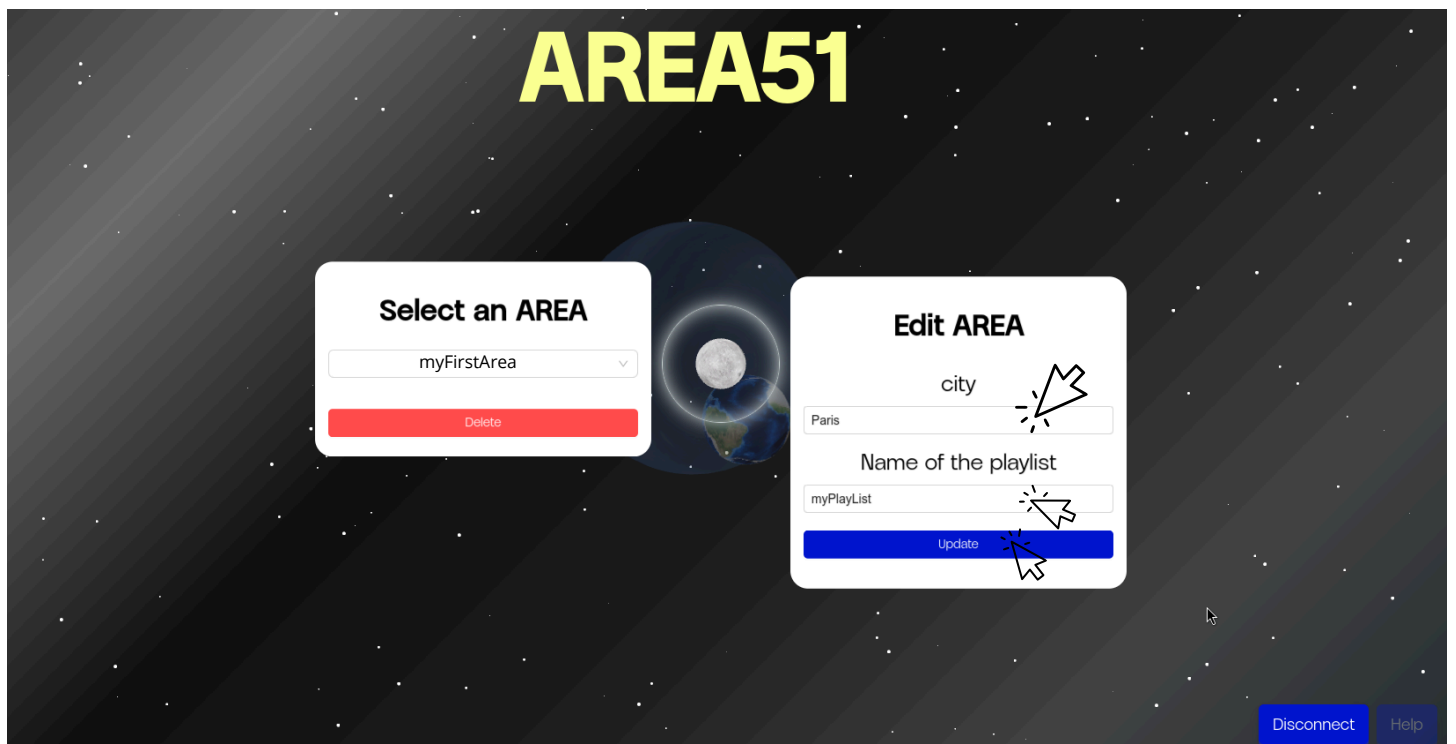

Click on **Moon**. There, you will have the possibility to modify the AREA and manage it. If you don't want an AREA anymore, simply delete it !

After **selecting** the AREA you want to change, you can have access to the different parameters and edit them, here the city to track and the name of the playlist.

Once the change did, click on “**Update**” to save the modifications.

If you just wanted to delete the AREA, select the AREA and click on the “**Delete**” button

**You are now able to create and manage your own AREAs !**

**Enjoy 🚀 !**
